

OUR FOCUS

Helping Christian schools understand culture through comprehensive and verifiable data; offering decision-making tools for school leaders that provide objectivity of data, clarity of issues, and unity of purpose.

OUR GOAL

Exceeding ordinary standards in our work as a reflection of God's character.

PARTNERS IN EXCELLENCE

SECURITY CONSULTANTS

SCHOOL SURVEYS

We work with Christian schools across the world helping them take a detailed look at prevailing attitudes and opinions of staff and families in nearly every component of operations. While other survey services provide you data, we provide you with a partner from start to finish who cares about the success of your school and the impact it has for God's Kingdom. When your survey is completed, we return to you a professionally presented report of the results along with narrated explanations and a free one-hour consultation. All surveys are conducted online, responsive on all platforms, and typically meet accreditation survey requirements. Don't be one of the many who do their own surveying but are then left with no clue what it really means.

Decide now to more accurately assess your situation and circumstances!

We are the exclusive survey provider for all TrustED assessments.

TUITION AID VERIFICATION

Ideal for small to mid-size Christian US schools, we manage the tuition aid application process by providing affordable, up-to-date and on-time assessment of family financial conditions through a concise verification process that assures accuracy of need. Our process takes the guesswork out of granting tuition aid and helps schools remain in compliance with IRS requirements for granting tuition assistance. Why spend what other companies want to charge? Our cost is just \$40 per year, per school. Parents pay an online application fee of \$35 (slightly higher for a paper app).

DEVELOPMENT COACHING

School personnel can now become thoroughly trained to design, execute, and expand a complete Development program through our one of a kind Development coaching model for Christian schools. Simply hiring someone to take on the Development role at your school will likely backfire if they do not have the necessary tools to succeed, costing you time, money, and frustration.
